Summary

I started my journey in data science through **machine learning projects** and **academic research**, but my perspective changed after **working with real operational and regulatory data in a customs environment**. There, I explored **risk model experiments**, **translated rule-based decisions into machine-readable features**, and worked closely with practical data constraints. I am particularly interested in building analytical systems that do not only perform well technically, but also make sense within real decision-making processes.

Education

Sriwijaya University
Bachelor of Computer Science

Aug 2021 - April 2025
GPA: 3.91/4.00 (**Cum Laude**)

Projects

Image Classification for Traditional Cakes Using CNN

University Project (Data Scientist)

February 2024 - March 2025

[Link](#)

- **Collected, explored, and preprocessed** a diverse dataset of traditional cakes
- Performed **exploratory data analysis** and applied data augmentation.
- Implemented & optimized **VGG19 and Xception** with **hyperparameter tuning**.
- Improved accuracy from **65%-73%** (previous research) to **97%**.

ASL Hand Gesture Detection using YoloV8

University Project (Data Scientist)

February 2024 - June 2024

[Link](#)

- Led **data collection and labeling** for a custom ASL (American Sign Language) gesture dataset.
- Built & trained a **YOLOv8** model (latest version at the time) for real-time hand gesture detection.
- Integrated the trained model with **OpenCV** to process live video input and display bounding boxes in real time.
- Achieved **95% accuracy** on test data and demonstrated reliable real-time inference.

Indonesian Football Analytics: Scraping & Visualization using Python & Power BI

Personal Project (Data Analyst/BI Analyst)

May 2025

[Github](#)

- Scraped and processed data on **550+ football players** from **18 Liga 1 Indonesia clubs** using **Python (Selenium, regex, pandas)**.
- Extracted key attributes including **name, club, position, age, goals, assists, cards, etc.**
- **Cleaned and structured** the dataset for analysis (Filling missing value, change format, and add new column)
- Published insights in an interactive **Power BI dashboard** and a detailed **Medium article**.

Demographic Dashboard of South Sumatra using Tableau & BPS Data

Personal Project (Data Analyst/BI Analyst)

May 2025

[Tableau](#) | [Medium](#)

- Developed an interactive dashboard using **Tableau** with official data from **BPS (Statistics Indonesia)– South Sumatra Province**.
- Designed multiple menu-driven pages (slides) covering key topics such as **demographics, economics, health and social indicators**.
- Implemented intuitive navigation, dynamic filters, and interactive parameters to enhance user experience.
- Published insights in an interactive **Tableau dashboard** and a detailed **Medium article**.

Working Experiences

Junior Data Scientist | Directorate General of Customs and Excise

Sep 2025 - Present

- Conducted re-training experiments on internal risk-scoring models, exploring resampling strategies and algorithm tuning to improve inspection efficiency and valid case detection.
- Developed an initial prototype scoring framework for regulatory compliance recommendation by translating rule-based criteria into machine-readable features.
- **Built a Python-based MCP Server tool to support controlled database query execution for internal analytical workflows.**
- Performed trade data discrepancy analysis to identify recurring inconsistencies in classification records.
- Conducted high-risk entity profiling and exploratory feature engineering, identifying behavioral indicators associated with elevated fraud rates.

Experiences

Data Analytics Track | Startup Campus Bina Bangsa x Google Career Certificate

Feb 2023 - June 2023 | Remote (Online) | [View Certificate](#)

- **Selected from 7,000+ applicants and completed Google Data Analytics Certification.**

Machine Learning Cohort | Bangkit Academy 2023 Batch 2 by Google, GoTo, Traveloka

Aug 2023 - Jan 2024 | Remote (Online) | [View Certificate](#)

- **Graduated with Distinction**, ranked among the **top 10%** in the machine learning path.

Laboratory Assistant | Image Processing Lab, Faculty of Computer Science

Aug 2024 - Dec 2024 | On-site (Campus / Sriwijaya University) | [View Certificate](#)

- Assisted lab operations and supported students in image processing and ML experimentation.

Organizational Experiences

Member of Machine Learning | Google Developer Student Clubs (GDSC) Chapter Unsri

Nov 2023 - Aug 2024 | [View Certificate](#)

- **Best Participants** in Machine Learning Study Jams Program
- Engaged in **ML discussions, knowledge sharing & team collaborations.**

Certifications

- **Google Data Analytics - [Google \(2023\)](#)**
- **Mathematics for Machine Learning and Data Science - [DeepLearning.ai \(2023\)](#)**
- **Machine Learning - [DeepLearning.ai \(2023\)](#)**
- **DeepLearning.AI TensorFlow Developer - [DeepLearning.ai \(2023\)](#)**
- **TensorFlow: Data and Deployment - [DeepLearning.ai \(2023\)](#)**
- **Data Scientist - [Dicoding \(2023-2024\)](#)**
- **Machine Learning Engineer - [Dicoding \(2022-2025\)](#)**
- **TensorFlow Developer Certificate - [TensorFlow \(2024\)](#)**
- **[Others...](#)**

Technical Skills

- **Languages:** Python
- **Libraries & Tools:** TensorFlow, Keras, PyTorch, OpenCV, Google Colab, Jupyter Notebook
- **Databases:** Understanding of database concepts, practical knowledge of database applications
- **Techniques:** CNN, Object Detection, Transfer Learning, Data Augmentation, Hyperparameter Tuning
- **Soft Skills:** Problem Solving, Critical Thinking, Detail-Oriented, Communication
